## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-19, is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, recites "forming a second dielectric film on the cavity-forming polymer containing a metallic wiring". It is not clear how the metallic wiring is related to i) the formation of the second dielectric film, or ii) the formation of the cavity-forming polymer, because prior to the step of forming a second dielectric film, the claims recites performing a polyamic acid/polyimide patterning step, and there is no provision, in the claim, of a metallic coating formation or a wiring step formation. Claim 1, further recites "removing the cavity-forming polymer between the multilayered wirings by heating to form a cavity between the metallic wirings". It is not clear if the recited "multilayered wirings" and "the metallic wirings" are same or different from each other. The instant claim does not recite or provide the formation of multilayered wirings or metallic wirings. The specification, on page 19, lines 8-13, discloses that a metallic coating is provided on the first dielectric film, prior to the polyimide formation, and patterning step. Appropriate correction is required.

***Allowable Subject Matter***

3. Claims 1-19, would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

4. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-19, are allowable over the prior art of record (U. S. Patent No. 6,165,890 (Kohl et al) and U. S. Patent No. 6,777,159 (Itatani et al)) because the prior art of record does not disclose using the claimed polyimide composition recited in claim 1 to form a cavity-forming polymer containing a wiring, and forming a cavity between metallic wirings by removing said cavity-forming polymer between the multilayered wirings by heating.

***Response to Arguments***

5. Applicant's arguments, see Remarks (page 8), filed 02/28, 2005, with respect to claims 1-5, have been fully considered and are persuasive. The 103 rejection of claims 1-5, made in the previous office action has been withdrawn.
